## WHAT IS 4LIFE TRANSFER FACTOR® BELLE VIE®?

4Life Transfer Factor® Belle Vie® provides comprehensive support for unique female needs. This formula begins with the immune support of 4Life’s Targeted Transfer Factor® blend, and combines it with herbal antioxidants, phytoestrogens, indoles, and Calcium d-Glucarate to promote gynecologic and breast health. 4Life Transfer Factor Belle Vie provides a powerful natural approach that reinforces your proactive strategy for health and longevity. With 4Life Transfer Factor Belle Vie, you really have a beautiful life!

## WHY IS IT IMPORTANT FOR A WOMAN TO SUPPORT BREAST AND GYNECOLOGIC HEALTH?

There are few things more important to a woman than her health. She wants to be healthy and vibrant, enjoying life for many years to come. Female system health, specifically the gynecologic system and breasts, are paramount to overall health for a woman. The gynecologic system includes the uterus, ovaries, cervix, vulva, and vagina.

## WHAT ARE TRANSFER FACTORS?

Transfer factors are messenger molecules that provide immune intelligence; educating immune cells to support the immune system’s ability to recognize, respond to, and remember potential threats. Transfer factors are not vitamins, minerals, or herbs that simply provide nutrients to the body. They are completely unique in that they transfer immune intelligence to the body.

## WHAT IS TARGETED TRANSFER FACTOR®?

Targeted Transfer Factor® products combine the immune system benefits of 4Life’s Transference™ ingredients with additional system-specific nutrients to provide a more focused and personal level of health support.

## HOW IS THE IMMUNE SYSTEM CONNECTED TO GYNECOLOGIC SYSTEM HEALTH AND BREAST HEALTH?

Targeted Transfer Factor supports the relationship between the immune system and the endocrine system. The health of the breasts and gynecologic system, like so much of the body, is influenced by the health of the immune system. Immune system support helps strengthen the body’s ability to promote normal healthy cell growth in these specific areas of concern, which in turn promotes optimal system function.

## HOW DO THE SUPPORT INGREDIENTS IN BELLE VIE PROMOTE FEMALE SYSTEM HEALTH?

Isoflavones, also known as phytoestrogens, are the core
