

4Life Transfer Factor® GluCoach™

TARGETING GOOD HEALTH THROUGH BALANCE

Maintaining healthy glucose (sugar) levels is an important part of pancreatic health and an even more important aspect of good health for millions of people around the world. Metabolic and endocrine disorders keep your body from producing or properly using insulin, a hormone that is needed to convert sugar, starch and other foods into the energy needed for daily life.

4Life Transfer Factor GluCoach is formulated to promote healthy glucose levels in the body and provide support for both the metabolic and endocrine systems. In addition to patented Targeted Transfer Factor technology, Transfer Factor GluCoach is formulated with minerals, herbs and phytonutrients that have been clinically shown to support healthy insulin function, improve glucose tolerance and promote pancreatic health.

Key Points

- **Supports Healthy Metabolic Function:** Pterocarpus marsupium, momordica charantia (bitter melon) and gymnema sylvestre are all well known for supporting balanced glucose levels. Both pterocarpus marsupium and gymnema sylvestre have also demonstrated an ability to support healthy function of the pancreas. Bitter melon has been shown to support glucose tolerance and the body's ability to process sugars.

Ginseng and fenugreek are herbs that promote healthy glucose and cholesterol levels. In addition, improved glucose tolerance and healthy insulin function are further supported with chromium and vanadium.

- **Supports Healthy Immune Response:** Transfer factors are tiny molecules that transfer immunity information from one entity to another. These "smart molecules" support healthy immune responses, including the body's ability to remember past health threats. 4Life Transfer Factor GluCoach provides the benefit of Targeted Transfer Factor for excellent support of metabolic and endocrine systems.
- **Provides Antioxidant Support:** Alpha lipoic acid (ALA) has been shown to be an important antioxidant to support healthy metabolic systems and structures. ALA supports healthy insulin function in the body and healthy blood sugar levels.

Technical Point

- 4Life Transfer Factor GluCoach is a Targeted Transfer Factor product and is protected by US patents 4,816,563, 6,468,534, and 6,866,868.

4Life strongly recommends the use of BioEFA in combination with 4Life Transfer Factor GluCoach.

DIRECTIONS: Take four to six (4-6) capsules daily with 8 oz of fluid.

Serving Size: One (1) Capsule
Servings Per Container: 120

Supplement Facts

Amount Per Capsule		% DV*
Chromium (nicotinate)	70 mcg	58%
Targeted Transfer Factor®	50 mg	**
A patented extract containing Targeted Transfer Factor from cow colostrum and egg yolk		
Pterocarpus marsupium	200 mg	**
Fenugreek	50 mg	**
Momordica charantia	35 mg	**
Gymnema sylvestre	25 mg	**
Korean Ginseng	20 mg	**
Alpha Lipoic Acid	30 mg	**
Vanadium (bis-glycinate oxo vanadium)	150 mcg	**

*Reference Daily Intake (RDI)

**Daily Value (DV) not established

Other Ingredient: gelatin capsule.
